

# TAGAWA GREENHOUSES

*ROOTED CUTTINGS, PLUGS & PREFINISHED PROGRAMS*

TGE  plus

# STILL GROWING... AFTER ALL THESE YEARS

Our colorful story began in 1967, when Frank Tagawa and his five sons produced vegetable transplants for their truck farming operations. From the 1970s through the 1990s, the business grew with the addition of roses and carnations.

Today, Tagawa has 60 acres of greenhouse production space and three production locations. We are **the largest annual bedding plant supplier in North America**, producing annual and perennial seedlings and liners for greenhouses, and offering finished annual and perennial products for mass market retailers. We also have **the #1 freight program in the country**, which we've established and streamlined over the last 20 years.

At Tagawa, we take a more **partnership-based approach** with our customers. Tagawa has partnered with Ball Seed® for many years to develop the highest level of customer service. We respond quickly

to our customers' needs and post tracking information for every shipment weekly on Ball's WebTrack® online ordering system. We also share a weekly "crop application report" on the chemicals last applied to your products so you can easily make choices on how plugs and liners are treated after transplant.

Another advantage to working with Tagawa is our **dedication to the company and our employees**. Tagawa currently claims second-generation family ownership, with 14 family members working in the business. Our president, Randy Tagawa, is very involved in the day-to-day operations of the company, helping to keep the family business running smoothly.

One of our top priorities is to provide our employees with **ongoing training and education**, in addition to instilling an atmosphere of empowerment. The expertise and ideas that come from our employees help us to make continued improvements to our business.

We also **invest in our equipment** to ensure consistent, high-quality and diverse products for our customers. We believe our company continues to grow because our people, products, the impact on our planet and customer profits are always at the forefront of our decision-making process. For our customers, this all translates to excellent products and professional service.

Unlike many other greenhouse facilities, Tagawa manages our own garden center, so we know **the challenges of the retail market**, and of wholesaling and selling finished product to major Big Box and home improvement stores. It also gives us a better understanding of the full chain of growth and distribution, which helps position us to provide the best young plants to our customers.

**What it all comes down to is that we care about our customers and want to do the best job we can to meet all of their plant needs.**

**RANDY TAGAWA**  
President

**WENDY WILDER-HECKARD**  
Young Plant Business  
Manager

**JOHN WILLIAMS**  
Quality Assurance  
Manager

**KANDACE GOTTLIEB**  
Account Services  
Representative

Our front line of service, the Ball Seed sales reps, come out to our facilities often and work closely with us to ensure that we provide the highest-quality products and quick delivery.

**MARY BENJAMIN**  
Traffic Manager

**JEANETTE MARTINEZ**  
Transportation Manager

**PAT LOPACHIN**  
Chief Operations Officer

Tagawa serves retailers, mass market wholesalers, garden centers, and seed-raised and vegetative-raised young plant producers.

# WE KEEP ON TRUCKING

We partner with Ball Seed to provide the #1 grower trucking program in the industry. With **guaranteed ship weeks** and orders shipped in **temperature-controlled trucks**, this fast, efficient and economical system helps to ensure that all products get to your greenhouse healthy and ready to transplant and thrive.

You can easily **track the progress of your shipment** through One Click Tracking on WebTrack at [ballseed.com/webtrack](http://ballseed.com/webtrack). This easy ordering and tracking system also allows you to set a five-day advance phone notification of your product's estimated time of arrival, to help you keep your production team on schedule.

**Tagawa consolidates shipments from local Denver greenhouses to yours on one climate-controlled truck, saving you additional time and money.**

# A HEAD START FOR BETTER ROOTING

Tagawa has invested heavily in making improvements to our eight-acre facility devoted exclusively to **rooted cutting production**.

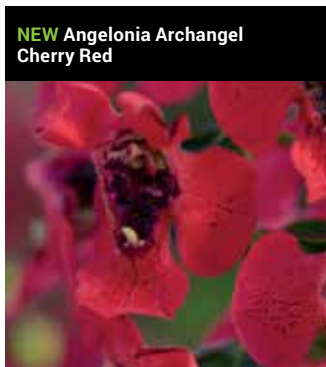

When evaluating our rooted cutting process, we focused on improving the environment from the moment the cuttings are received on the loading dock to when the shipments are going out the door. For example, we **pre-cool and pre-hydrate** our cuttings before sticking, and we maintain a balanced environment while sticking through Fog and Argus controls. We also fully utilize **Vapor Pressure Deficit (VPD)** throughout our facility to ensure high-quality rooting.

As a result of these measures, we have seen an increase in consistency and order fulfillment. And if cuttings are damaged upon shipment to Tagawa, we now have the ability to **improve the quality** of these inputs and still produce a high-quality liner.

# HIGHLIGHTS FROM OUR ROOTED OFFERINGS

## ANGELONIA ARCHANGEL™ SERIES

The biggest blooms of any angelonia series! Thrives in extreme heat, humidity and drought. Uniform habit and flowering time for easy, high-density production. Well-branched plants ship with less breakage, tangling and shrinkage. Works well in quarts, gallons and mixed containers.

## NEW BACOPA MEGACOPA™ SERIES

This new series of bacopa is notable for its well-branched habits, large flowers and improved heat performance. Largest flower size in the industry, with showy blooms that cover the plant, driving impulse sales at retail.

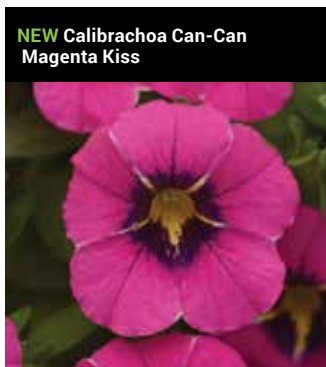

## NEW BIDENS BEE ALIVE

Controlled habit is ideal for small pots up to hanging baskets. Easy production for retail. Exciting novelty color and pattern for Spring and Fall. Great color that can be produced during the heat of Summer for Fall sales – also works in Fall mixed combos!

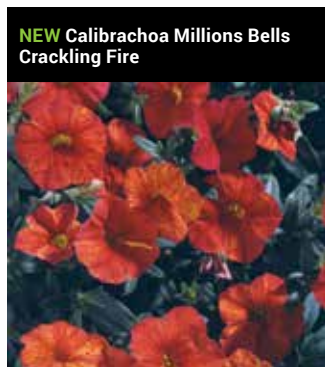

## CALIBRACHOA CABARET® SERIES

Super-uniform in habit and flower timing, so you can mix all colors in the series. All varieties flower with 11-hour days and stay open and in flower under low light conditions – a big plus at retail. Well-branched with full centers. Works well in 4.5 to 6-in. pots up to large baskets.

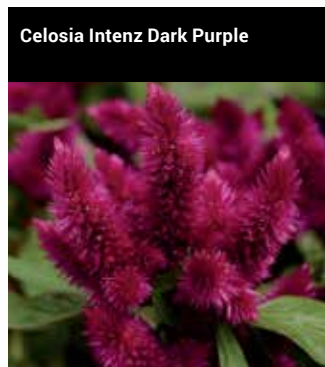

## CALIBRACHOA CAN-CAN® SERIES

One-of-a-kind colors and strong vigor for full-bodied mixed containers. Flowers stay open under the lowest light conditions to look fresh at retail! Strong adaptability: specially selected to stand up to harsh conditions. Well-suited for 6-in. pots up to large hanging baskets.

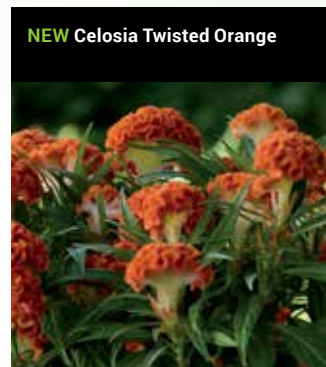

## CALIBRACHOA MILLION BELLS SERIES

Profuse, self-cleaning flowers arrive in Spring and keep going until Fall. The Cherry Pink, Terra Cotta and Yellow varieties have a more upright, cascading habit, and bloom even during short days. Plant height can reach up to 10 in.

## CELOSIA INTENZ™ SERIES

Easy-to-produce plant has bold flower spikes that look great at retail. Continues to bloom throughout the Summer and Fall, making it perfect for an indoor program or in a garden.

## CELOSIA TWISTED™ SERIES

A fantastic option in the world of vegetative Celosia, with bold colors on a unique flower. It has much of the same retail appeal as Intenz Celosia Classic, and can be grown similarly, making it an easy add-on.

**NEW Coleus FlameThrower Habanero**

**COLEUS FLAMETHROWER™ SERIES**

Bold foliage colors in a compact habit make this striking coleus ideal for small pots and mixed containers. Its uniquely colored and shaped leaves add texture in the garden and containers. Great garden performance in sun and shade.

**NEW Coleus French Quarter**

**NEW COLEUS FRENCH QUARTER**

Adds depth to coleus programs with the addition of a pink. Features pink, magenta and green leaves. Familiar pattern of seed coleus, but more vigorous and much later-flowering.

**NEW Craspedia Golf Beauty**

**NEW CRASPEDIA GOLF BEAUTY**

Excellent in hot climates, Golf Beauty blooms all Summer with golf ball-shaped, gold flowers that sit high above the plant. Originally bred for cut flower uses, this makes a fantastic patio cut with blooms that get more dense as it continues to flower. The total plant height is as tall as 14 inches.

**NEW Cuphea Lavender Lace**

**NEW CUPHEA LAVENDER LACE**

Cuphea Lavender Lace is a durable, heat-tolerant plant with small purple/lavender flowers and dark green leaves. Cuphea Lavender Lace grows about 10 to 12 in. tall and can spread 16 to 18 in. It is fairly drought tolerant and attracts hummingbirds and butterflies.

**Dahlia Dahlietta Patricia**

**DAHLIA DAHLIETTA® SERIES**

Dahlietta flowers in as little as 7 weeks for quick turns. More colors, patterns and improvements create a best-in-class, easy-to-grow assortment.

**Fuchsia Angel Earrings Cascade**

**FUCHSIA ANGEL EARRINGS SERIES**

Angel Earrings is a brand name given to an outstanding series of fuchsias which are very heat tolerant and have outstanding garden performance with continuous blooming. Habits vary between varieties from trailing to upright.

**NEW Fuchsia Cora Bells Rose Purple**

**NEW FUCHSIA CORA BELLS SERIES**

Eye-catching plants with an upright habit, Cora Bells boast bunches of slender flowers that continue to bloom and last longer than other varieties. Use in part shade in any garden soil. Cora Bells grow to 18 to 24 in.

**Fuchsia Giant Voodoo**

**FUCHSIA GIANT COLLECTION**

Fuchsia Giants are trailing plants ideal for containers and hanging baskets. They also look beautiful trailing over walls and in rock gardens. Providing vivid colors from Summer until frost, these plants grow quickly into magnificent specimens with multiple flower colors.

# HIGHLIGHTS FROM OUR ROOTED OFFERINGS

## FUCHSIA UPRIGHT DOLLAR PRINCESS

This bushy variety bears a profusion of double purple blooms with contrasting cerise pink sepals over a particularly long period. The ruffled blooms of Fuchsia Dollar Princess appear early in the season on vigorous, upright stems. This popular hardy fuchsia is well loved for its showy blooms and excellent garden performance. A lovely compact specimen for a patio container or planted at the front of mixed borders.

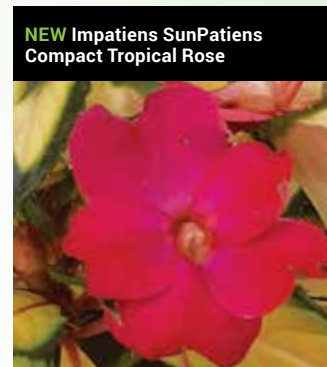

## GERANIUM, ZONAL FANTASIA® SERIES

Excellent uniformity for more plants per sq. ft. and optimum shipping density. Targeted range of core and novelty colors simplifies selection. Best suited to 5-in. and larger pots and hanging baskets.

## GOMPHRENA PINBALL SERIES

As the first vegetative gomphrena on the market, Pinball stands apart with its strong mounding habit and vibrant color for increased sales at the retail level. Proven landscape performance, exceptional heat and drought tolerance, and outstanding presentation make this a winner at retail and for consumers. The unique texture, mounding habit and continuous flowering make Pinball an excellent component plant for mixed containers.

## IMPATIENS SUNPATIENS® SERIES

Tolerates all weather, Spring through hard frost. Unique varieties love sun as well as shade.

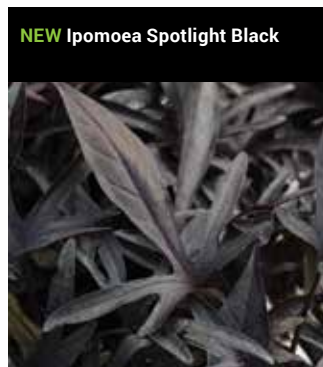

## NEW IMPATIENS CLOCKWORK® SERIES

Like clockwork: New Guinea Impatiens series has high uniformity of habit and flower timing across all colors, blooming all in the same week. Large blooms. Ideal for quart and gallon containers, and hanging baskets.

## IPOMOEA MARGUERITE

Bright chartreuse foliage provides a light color for this trailing vine. An excellent foliage contrast in containers, baskets, window boxes or garden beds. Produces small, white flowers in warm tropical conditions, but is mainly sold as a foliage plant for accent.

## NEW IPOMOEA SPOTLIGHT™ SERIES

The first compact ipomoea series! Spotlight's compact, naturally branched habit is ideal for packs and small pots. The series features three bold, eye-catching colors and holds its color in extreme heat. Great for mixes, too.

## LANTANA LITTLE LUCKY™ SERIES

Uniform across all colors; great for bench runs and pot-tight production. Up to 3 weeks earlier than other compact lantanas. Low-maintenance varieties have long flowering into Summer with low seed set. Perfect for 4.5-in. programs.

Lobelia Early Springs Magenta

**LOBELIA EARLY SPRINGS™ SERIES**

Early Springs is a series of highly uniform plants. Try mixing colors for a great-looking monoculture basket. Compact habit allows for pot-tight production with minimal PGRs and easy shipping. Can be grown cool for energy savings, but performs beautifully in heat. Just one plant fills a quart or gallon container.

**NEW** Lobularia Raspberry Stream

**NEW LOBULARIA STREAM SERIES**

Lobularia Stream varieties are heat tolerant, with sweetly scented blooms that last all Summer and into Fall. They have the right shape for use along the front of a border, and their spreading habit makes them perfect for containers and hanging baskets.

Lophospermum Wine Red

**LOPHOSPERMUM WINE RED**

Rich burgundy-wine, tubular flowers adorn this cascading vine. It can be trained on a trellis. Grows to 12 in.

Osteospermum Blue Eyed Beauty

**OSTEOSPERMUM BLUE EYED BEAUTY**

Change the way you look at osteos – perfect for premium, early Spring sales. Exceptional bicolor has excellent habit, flower presentation and shelf life.

Petunia Black Magic

**PETUNIA BLACK MAGIC**

The blackest black petunia on the market! Features stable, nonstriping blooms with excellent flower form and a controlled, mounded, trailing habit.

Petunia Cascadias Indian Summer

**PETUNIA CASCADIAS™ INDIAN SUMMER**

Striking blooms open orange and mature to salmon pink – sure to drive impulse sales. Well-branched habit is ideal for 12-in. hanging baskets and patio pots. Unique color option pairs with excellent garden performance.

**NEW** Petunia ColorRush Pink

**NEW PETUNIA COLORRUSH™ SERIES**

Notable for big vigor and big garden performance. Highly vigorous line is ideal for 12-in. and larger containers and baskets, as well as landscapes. Mounds of color hold up in the heat and rain. It includes a range of bright, eye-catching colors and novelties. These varieties have nicely matched habits, making production planning easier.

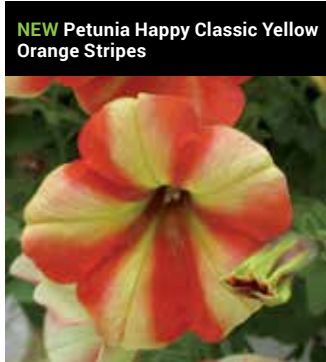

**NEW** Petunia ColorWorks Homare

**NEW PETUNIA COLORWORKS SERIES**

Extremely floriferous with striking colors, ColorWorks petunias have a mounding or semi-trailing habit ideal for both basket and pot production. Early to bloom with outstanding garden performance, ColorWorks grows 10 to 16 in. and thrives in full sun.

# HIGHLIGHTS FROM OUR ROOTED OFFERINGS

## NEW PETUNIA HAPPY CLASSIC YELLOW ORANGE STRIPES

The newest, and possibly the most beautiful, of the 'Happy Classic' series of petunias features a classic growth habit with natural basal branching for production in hanging baskets and containers. Makes a stunning basket.

## PETUNIA SURFINIA SERIES

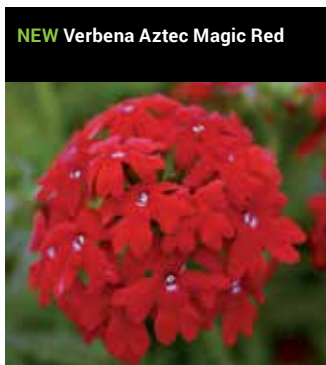

Surfinia petunias bloom continuously all season long and they tolerate rain, summer heat and wind. Their cascading habit makes them perfect for hanging baskets, landscapes, window boxes and pots. Easy to grow and maintain, Surfinias are self-cleaning and hold up to rain very well. Grow in full sun to part shade for best results.

## PURSLANE RIO GRANDE™ SERIES

All-new genetics produce varieties that are well-matched in vigor, controlled habit and good branching. Exceptionally large flowers in a vibrant range of core colors – beautiful in baskets. Rugged performer thrives in heat and keeps flowering all Summer.

## TORENIA SUMMER WAVE SERIES

Summer Waves thrive in the heat where others wilt, and they also tolerate dry soil. Blooms are self-cleaning, plants branch well and have a lush trailing habit that is easy to grow and maintain. Ideal for shady borders, hanging baskets and patio pots, Summer Waves withstand heat and disease very well.

## VERBENA AZTEC MAGIC™ SERIES

The best trailing verbenas. Distinguished by their fine, serrated foliage, the bright and colorful plants thrive in heat and sun. Delivers a quick crop time, uniform flowering and the same exceptional powdery mildew resistance as Aztec. Ideal for early to mid-season pots and baskets.

## VERBENA ENDURASCAPE™ SERIES

The first verbena that's hardy in the hottest days of Summer, but can take the cold down to the low teens and still re-bloom in Spring. EnduraScape revs up the color with eight high-octane varieties. Superior branching: finished product has a full habit with high bloom count in gallon containers. Excellent powdery mildew resistance.

# PUTTING IN A “PLUG” FOR OUR PLUG PROGRAM

We have retooled our facilities to focus more efficiently on plug production. With **over 2,300 unique seed varieties** available from Tagawa, we want you to think of us as your “One-Stop Shop” for plugs.

Another advancement we've put in place is the use of the Punch 'N Gro® machine, invented by Tagawa over 20 years ago. This simple, mobile transplanting system results in **highly efficient, high-speed transplanting** without the need for electricity. The labor-saving machine pushes plugs through the tray into finished containers without damaging the

cuttings, resulting in **stronger, healthier roots**. And it requires almost no maintenance.

Ask your Ball Seed sales rep about this and other labor-saving transplant bundling options available. And visit WebTrack to find out more about for our full seed listing.

Pictured: 288 and new 128 trays

In addition to our standard tray sizes (288, 324, 432, 512), we offer a new tray configuration that allows **more plugs to be added per tray** for better value for our customers. This economical tray now contains **128 versus 102 plugs**, maximizing space for better freight rates.

# TOP 10 SEED PRODUCTS

Dianthus Jolt Cherry

# ZEROING IN ON PREFINISHED PLANTS

At Tagawa, we offer the solution for growers who want to turn their facilities or retail spaces more quickly and more profitably.

## SPRING PREFINISHED

During the Winter months, we get young plants started in 4.5-in. pots in perfectly controlled greenhouses. By Week 6, the prefinished plant reaches the point where it is perfect for using in hanging baskets and combos. From here, our Southeast and Midwest customers only need around two weeks and a simple routine to bring these plants to market. The **quick turnaround** of these retail-ready plants saves our customers **time, labor and energy** in growing full, healthy plants. This means that you get what you need — as soon as possible.

Available Weeks 6–20:

- 1,000-pot minimum
- 50-pot minimum per variety
- 10-count shuttle tray ships with plants on rack
- Tags ship in pots with plants

The **order deadline is December 31, 2016**. Contact your Ball Seed sales rep for more information.

## FALL PREFINISHED

In the Fall, Tagawa produces **high-level, florist-quality cyclamen** for the landscape or retail markets in warmer climates. In Weeks 42 to 52, we offer our Southeast and Southwest markets these cyclamen in two pot sizes — 4.25 and 6 in. And as a preferred supplier, we are able to offer the sharpest price point in the industry.

**WEBTRACK®**

## TAGAWA AND BALL WEBTRACK TAKE YOU FROM START TO FINISH – AND BEYOND

Tagawa offers our customers the ease of using Ball WebTrack, a simple, live, 24/7 system for ordering and tracking products. As a "Gold Supplier" for Ball Seed, Tagawa continually maintains a **5-Star rating** on WebTrack, the highest level of customer order-fill status we can earn. This rating means we always strive to fill your orders in full, at top quality and on time.

WebTrack also offers a variety of tools and services to help you **manage your business**, including:

### ORDER PLACEMENT

Instant online access to **live inventory** of thousands of products. Reserve your order anytime, anywhere, and set the delivery date for when you need it.

### ORDER AND SHIPMENT STATUS

**Check the status** of your order and see your Tagawa order's **shipping reports** posted to WebTrack on a weekly basis.

### WEEKLY CROP APPLICATION REPORTS

Unlike other suppliers, Tagawa updates WebTrack weekly with "**crop application reports**" of what chemicals were last applied to our products. You can use this to decide how your plugs and liners should be treated after transplant.

### MANAGE YOUR ACCOUNT

Store up to two years of **order history** in WebTrack's "electronic file cabinet" for easy retrieval and reordering.

---

The high light levels and low humidity in Denver, Colorado, the home of Tagawa Greenhouses, allow us to achieve our #1 goal – to provide you with the highest-quality, consistent young plants. The dry climate reduces any potential disease challenges, and the high light levels help grow young plants with enough health and vigor to be transplanted successfully into our customers' finished production.
