## Burpee packaging

We know it's important to keep up-to-date on how to merchandise, what sells and what consumers are looking for in a plant. Our most recent research provides the basis for the fresh, new look of our brand that matches current consumer lifestyles. Our redesigned pots, tags and POP offer a contemporary style that draws more attention to the retail shelf and rack. But, we know that you need more than good looks. Our tags, signage and online resources provide consumers with vital information to ensure gardening success.

We've refreshed our tag design and color-coded the tags to match our programs - Space Savers, Amazing Veggies, Foodie Fresh, BOOST, Herb and Organic. The tags are eye-catching, but also provide essential and detailed growing data. Information on the tags helps with retail sell-through by assisting consumers in making well-informed purchasing decisions, and in planning, planting and maintaining a successful garden.

## Amazing Veggies

Burpee's Amazing Veggies collection is just that – amazing. Your customers will get outstanding proportions and quality – colossal veggies, basket-bursting yields and tantalizing taste.

“There are many remarkable vegetables in our collection, but my favorite is the **NEW Gold Standard Pepper**. Stuffed peppers have been a long-time, traditional recipe in our family. When Burpee's Gold Standard pepper came into my life, I was excited to incorporate this pepper into my old-style recipe. The results were amazing! It took our simple stuffed pepper meal to a whole new level of flavor, color and texture. Gold Standard is a must-try variety in my book!”

## Foodie Fresh

Inspire your customers' inner gourmet with new, unique varieties of specialized and flavorful vegetables in the Foodie Fresh collection. Exotic origins and recipe thrillers raise the sublime to a whole new level – and take them on a culinary adventure.

“One of the new Burpee varieties I am most excited about is the **NEW Dragon Roll Pepper**, which delivers a unique mingling of heat and sweet. This Japanese, Shishito-type pepper is a lot of fun to eat because one in 10 will surprise you with some heat! For best results, they should be roasted in the oven or flash fried – and then enjoyed with friends!”

## **BOOST Antioxidant Collection**

Customers with an active and fit lifestyle can satisfy their craving for nutritious food with the BOOST collection. These vegetables are specially selected and packed with higher levels of antioxidants: vitamins A, C and E; beta-carotene; selenium; and lycopene - all important nutrients to keep them on the path to living healthy.

“The BOOST collection, an original grouping in Burpee, has been a long-time favorite. I often say, if you can only grow one or two tomatoes, why not make them the most health-boosting ones on the market? This collection has big appeal among today’s consumers, and the fresh new look at retail will be very enticing. If you haven’t grown BOOST varieties lately, do your customers a favor and add a few back into your assortment.”

## BEAN

**Exclusively Burpee!**

### Beananza

**Height:** 15 in. (38 cm)

**Spread:** 10 in. (25 cm)

**Days to harvest:** 45

Perfect for small-space gardens! This high-yielding dwarf French bean plant offers loads of 6 to 7-in. (15 to 17-cm) beans with good flavor and no strings. It features a long harvest, too, so you get more of these tasty beans over the season.

### Blue Lake Bush

**Height:** 12 to 22 in. (30 to 56 cm)

**Spread:** 12 to 18 in. (30 to 46 cm)

**Days to harvest:** 52-65

Get improved flavor and tenderness in a virtually stringless bean. It's a heavy producer over a long season, and is excellent fresh or frozen. We find the beans to be at their peak when 6.5 in. (16 cm) long. Enjoy a bountiful and extended harvest by picking daily.

## BROCCOLI

### Destiny F1

**Height:** 24 to 30 in. (61 to 76 cm)

**Spread:** 24 in. (61 cm)

**Days to harvest:** 70-75

This mid-early, compact, heat-tolerant broccoli variety features medium-small green beads, a smooth dome and a round shape. A flavorful source of vitamins A and C. Suited for Fall harvest when planted in Summer.

**Available as organic.**

### Raab Zamboni

**Height:** 24 to 30 in. (61 to 76 cm)

**Spread:** 12 to 18 in. (30 to 46 cm)

**Days to harvest:** 70

Our Italian broccoli (Spring Rapini) has green shoots and tasty, mustardlike leaves with a captivating flavor. It's a favorite choice for Italian and Chinese cooking. Try it sautéed with garlic and olive oil, fresh in salads or cooked in soups. Cut 6-in. (15-cm) pieces when the "broccolis" are the size of a quarter. A great source of vitamins A, C and K, as well as potassium.

## BRUSSELS SPROUTS

### Franklin

**Height:** 24 to 30 in. (61 to 76 cm)

**Spread:** 12 to 24 in. (30 to 61 cm)

**Days to harvest:** 80

These 1-in. (2-cm) sprouts look like miniature heads of cabbage, and are tasty when steamed just to the point of tenderness or enjoyed raw. Their flavor is improved by a few light frosts. Grow Franklin as a Fall crop in the North and as a Fall and Winter crop in frost-free areas. With less-woody stalks than other varieties, whole stem harvest is possible.

## CABBAGE

### Big Flat Head

The very sweet, tender, green and white heads each weigh in at 5 to 7 lbs. (2.2 to 3.2 kg). With its very short core and less dense interior for easy slicing and shredding, this is also a great choice for cole slaws and cooking.

Cabbages can take some heat, but they love the cold, which means that you can have a cabbage or two gracing the garden in Spring and Fall, as well as Summer.
