Achillea 'Flowerburst Fruitbowl'- beautiful fresh or dried, an explosion of color!

Amaranthus cruenes 'Hot Biscuits'

Ammobium alatum 'Grandiflorum'

Dried flowers continue to stay on trend and can be a channel for profitability throughout the winter months-keeping us in touch with our customers after the summer harvesting season is over!

Ball Seed/Ball Colorlink brings to you a can't miss collection of flowers tried and true along with those that are new that can be enjoyed fresh or dried, dual use for maximizing your sales potential!

- Amaranthus cruenes 'Hot Biscuits'- a must have with high productivity, being easy to grow, and provides an amazing texture to arrangements and bouquets.
- **New** Ammobium alatum 'Grandiflorum' is perfect for weddings and can be harvested multiple times during the season. Best cut when the yellow center is still in the "cup" of petals for drying.
- Gomphrena globosa 'Strawberry Fair' is a recent release with deep orange-red flowers with a tinge of rose adding vibrancy and interest to bouquets that holds its color well when dried.
- Orlaya grandiflora 'White Lace' works wonderfully as a dried flower harvested once the seed pods have formed.
- Scabiosa stellata 'Paper Moon' is another recent release that has bluish-white flowers with spherical everlasting seed heads
- **New** Achillea 'Flowerburst Fruitbowl' is simply bursting with color including apricot and rosy hues, colors in high demand by today's customer!
