Bupleurum rotundifolium 'Green Gold' brightens up bouquets!

Setaria italica 'Hylander'

Ammi visnaga 'Green Mist'

Foliage and accents stems are just as important as the flowers in a bouquet. They create the structure and contrasts that supply the backdrop for the focal flowers to really shine!

Ball Seed/Ball Colorlink offers the Foliage Flourish Collection- add this "greenery" to your mix to provide texture and help to define the shape and style of your bouquets.

- Bupleurum rotundifolium 'Green Gold' has been carefully selected for its unique color!
- Ammi visnaga 'Green Mist'- a cut flower staple with larger, richer green and mounded umbels compared to the standard Ammi majus.
- Setaria italica 'Hylander' is a tall grass with long flower heads, adding charm to any bouquet.
- Eucalyptus cinerea 'Silver Dollar'- an extremely popular selection that can be used in fresh and dried arrangements. Large leaves fill space for a full design effect.
- Gomphacarpus fruticosus 'Cottonbush' has pointed inflated pods that are pale green tinged with shades of red and brown with a shrubby plant habit. Awesome texture!
- Cerinthe major 'Pride of Gibraltar' has thick grey green rounded foliage with purple bracts that deepen with cooler night temperatures making this an attractive foliage filler.
