Essential Growing Tips

Temperatures: 68° to 86°F day/41° to 59°F night (20° to 30°C day/ 5° to 15°C night). Lower night temperature is recommended for brighter flower color and strong (hardened) foliage.

Humidity: below 70%-75%

Light level: 50,000 - 80,000 lux (5,000 - 8,000-foot candles)

pH level: 6.0-6.5

Recommended pot size: 5 ½" (14cm)

Drip irrigation is suggested, do not over water. Avoid over head watering to avoid fungal diseases.

The initial flower stem should be removed at the base as soon as it is big enough to pinch out to encourage branching and grow a premium crop!

Crop Times

Summer/Spring:

4 weeks to first flower
10-12 to full flower

Autumn/Winter:

4-8 weeks to first flower
16-18 weeks to full flower
