

Clear Crystal[®] with first-ever colors & bigger vigor

Clear Crystal Purple Shades

Clear Crystal Series Alyssum
Unique Lavender Shades and Purple Shades are the first pigmented tetraploid alyssums, and are well matched to White.

This exciting tetraploid series delivers superior vigor; fragrant, larger size flowers; and stronger performance in containers and landscapes than standard alyssum varieties. Fewer PGRs are needed in most markets, and plants can be produced with little or no heat. It also boasts more heat tolerance than standard alyssum varieties.

Clear Crystal series received excellent ratings in 2008 at the W. Madison Ag Research Station in Verona, Wisconsin and at the University of Minnesota Annual Flower Variety Trial in Grand Rapids.
