Growing Instructions
Plants should be grown in a high tunnel for protection from frost when they are at their peak bloom period.

⇒ Plants should be planted upon arrival.
⇒ Pinch the plants three weeks after planting. Leaving six leaf nodes, resulting in six stems per plant.
⇒ Early, Mid, or Late bloom time is listed on each photo.
15 Early varieties that start blooming Oct 19 - 21
20 Mid varieties that start blooming Oct 24 - 30
19 Late varieties start blooming Nov 3 - 8
(Based on Zone 6b, SW Virginia)
⇒ Space two plants per sq foot.
⇒ Support netting is required.
⇒ Fertilize with 20-10-20 At 200ppm N
⇒ Watch for aphids and white flies. Treat as needed.
⇒ Side disbudding not required, but will produce a larger single flower, especially with Shanghai Red and Golden Gate.

A great fall crop for extended sales after dahlia season ends.

NOTE: All varieties are Patented. Propagation is prohibited. Growers may not root additional cuttings.
