*Cut Flower Bulbs
by Unex*

Unex Inc. started as a Dutch family business in 1976

Since 1976 the goal is to supply the North American market with high quality perennial roots and flower bulbs.

Carefully selected offer

As one of the leading Dutch exporters, we supply high quality bare root perennials and flower bulbs, which are grown and cultivated in The Netherlands for the North American market.

We work as partners with our growers and customers and strongly believe in long term relationships.

Reliable delivery

With our experience in international transport and transport regulations we have developed a reliable solid supply into the North American market. In addition, our two locations, one in The Netherlands and one in The United States, support our need for a reliable storage before delivery.

Our clients

Unex Inc. offers a complete listing for: Growers, Landscape Growers, Garden Centers and Municipalities & Parks.

Dahlia

Information

Dahlia tuber

Dahlia tuber clumps produce beautiful cut flowers from summer through fall. Dahlias are mainly grown for cut flower production but they are also used in large containers and in the landscape.

Information

Gladiolus corm

Gladiolus are great cut flowers with a vase life of approximately 10 days. Blooming in mid-summer, Gladiolus can be succession planted to spread out the harvest period. The buds on the tall, strong stems bloom from the bottom up, adding great color to the garden and landscape for several weeks.

Lily

Information

Lily bulb

Lilies are one of the most popular cut flowers grown in the world. They are known for their wide range of colors and types. When harvested and sold in bud form, vase life can last well over a week. Lilies are hardy perennials and make a great garden plant.
