

Reach for the "Emerald Ring"!

New Begonia Emerald Ring from Ball Ingenuity

BallSeed.

Reach for the "Emerald Ring" and bring to your customers an exclusive opportunity to succeed!

Emerald Ring has velvety emerald green foliage laced by a beautiful silver ring with a vigorous, well branched habit.

It works very well as a standalone but also as a semi-cascading accent in a shade combination, hanging basket or as an easy-care, long lived and unique houseplant.

Carefree for the consumer and easy to grow in production-a winner!

Begonia Emerald Ring Cultural Tips

In growing on, allow media to dry moderately between waterings. Keeping Emerald Ring too dry can cause foliar issues.

16-hour days promotes faster growth, particularly in the winter months. Apply shade cloth during summer or periods of high light, grow at 1,200-1,800 foot candles.

Maintain a pH of 5.7-6.4
Fertilize bi-weekly at 150- 200 ppm N. Over fertilization can cause plants to stretch.

PGRs are not needed.
