

# BALL PREMIER LINE® SEED

Today more than 80% of our seed inventory – billions of seeds each year – passes through our Ball Premier Lab for coating and pelleting, priming and testing. You benefit from reduced shrink, reduced cost and improved yield.

## BALL VIGOR INDEX® SEED

Our patented plug testing method determines the vigor and uniformity of seed lots by analyzing physical characteristics and responses of seedlings grown in a plug tray. The higher the rating, the better the quality. You can be assured of great performance from every packet of seed that displays the Ball Vigor Index rating.

- Coleus (PL)
- Dianthus (PL)
- Dusty Miller (PL)
- Impatiens (HE & CT)
- Pansy (GS)
- Petunia (PL)

## PRECISION™ MULTI-PELLETS (PMPL)

The first-ever professional-quality multi-species and single-species Precision Multi-Pellets are specially formulated to deliver a balanced mix of two or three varieties. Tried and tested in the lab and in the greenhouse, they germinate and grow compatibly. All components are present at least 90% of the time.

- SimplyHerbs™

## AMPLIFIED SEED (AMP)

Enhanced through a proprietary process for fast, uniform germination.

- Echinacea

## TREATED NON-CHEMICAL

Seed has been disinfected without the use of fungicides, reducing the seedling pathogens on the seed.

- Salvia

## BALL CONTROLLED GROWTH™ SEED (BCG)

Every Ball Controlled Growth seed is treated with A-Rest® at the optimum rate for each lot. It's safe, sustainable, and saves you time and money while producing quality products.

- African Marigold (CT)
- French Marigold (CT)
- Zinnia (CT)

A-REST is a registered trademark of SePRO Corporation.
