

Container Solutions The Gardens at Ball 2022

Performance from Spring to the End of
Summer

Container Solutions - Best of the Best 2022

Our program is created by designing incredible containers using the best genetics from all forms: seed and vegetative, annuals to perennials, with a sprinkle of herbs and tropical plants!

Created the last week of May in West Chicago, IL using industry standard finished sizes per crop in various medium- to large-size containers.

Scale too grand for your market? Subtract an element to fit your container size!

Minimal care was given recreating the “homeowner’s” experience designing long-lasting, show-stopping solutions for container gardening success late spring through the end of summer.

The King's Rule

- Ruellia spp
- Cyperus King Tut
